

Conservation of Water Update

- 1). City demand this time of year for water is <> 4.5 Million/day
- 2). Town of Ulster has stopped taking water which reduces that demand to 3.9 MGD. In turn, they are sending us 0.5 MGD. So the demand now is 3.4MGD.
- 3). With the 18" line down, the filter plant can only produce 3 MGD.
- 4). So we are still not meeting demand by about 0.4 MGD.
- 5). Conservation is now more important than ever.
- 6). We are asking everyone to conserve for a t least the next 5 days.

We thank all our rate payers for their attention to this matter.
